WONDERFUL LAND.

What Governor Franklin Has to Eng About Our Mineral and Agricultural Possibilities.

Following is an extract from Governor Franklin's report, in which Arizona's agricultural, mineral and elimatic worth are ably and comprehensively reviewed:

"The agricultural resources of Arizona cannot as yet be computed with any great degree of accuracy, as their development is little more than begun.

"Millions of acres within what is called this arid region will be reclaimed, and this territory will in the near future be a great agriculleys, and they are extensive, are as rich as the land of any portion of the globe.

"The Salt River valley alone is as large as the entire state of Rhode Island, and when you consider the extent of all the valley lands of the territory it will be found that we have an agricultural area that will compare favorably with many of the great states in the Union,

"This is a great mineral region. Our mountains are full of the precious metals, yet we have an area of land that can be reclaimed sufficient to make a great aggricultural state.

"A large portion of Southern Arizone is semi-tropical. The orange, the lemon, the almond, and in fact, all the semi-tropical fruits are produced with grand results. Is it not a grand agricultural horticultural dailies, if they would begin life country where on the same section of land corn and alfalfa, wheat, barley, the orange, lemon, almond, grape and pomegranate can be found growing side by side? Very few countries in the world produce such an exhibition.

"The winters are mild-there is no day in the year that the husbandman can't work in his shirt eleeves with comfort. We have almost perpetual sunshine. For only three months in the year is the heat oppressive, and during that period,

"The agricultural and horticulseek a region where remunerative profits are to be realized. #### The Newspaper Man.

The man who wrote the following evidently knew what he was writing about, and to have become as familiar with the subject as he shows himself to be, he must have gained his knowledge by experience. The article is credited to the Albany Journal, and here is what it snys:

"Newspaper men are not morbid or especially dissatisfied with their lot, but it may be said that ninetenths of them, outside of the large over again, would avoid a printing has been made to Swansen, Wales. office as they would a pestitence. They see and come in contact with else. They are swindled oftener, forgery. ten to one, than anyone else; even those who pray, often times prey upon the newspaper man. Appreciation for him, as compared with what he does in and for a community is reduced to a vanishing point and accompanies his income to a limit of nothing less. In addition to his capabilities as a writer, when he possesses it, he must be a careful, painstaking and judicious business in that light at all. He is expect- over a load of lumber. ed to do a thousand things with his paper that, as a business will surely come and capital will ple want to know what a newspaper inst.
